## *CE Certification & Statement of Warranty*

The **RasPiGNSS expansion module** has been tested to **conform to CE standards** as part of the PiGNSS device (see [pi-gnss.com](http://pi-gnss.com)). It has been certified to conform to European norms *EN 55022:2010 Class B* and *EN 55024:2010* by the *Austrian Federal Institute of Technology, Electrical and Electronic Engineering* under number *TGM-VA EE 35307 EMC*.

The product has been manufactured with due diligence using state-of-the-art manufacturing techniques. Every product is tested to conform to its specifications and functionality as advertised. We therefore guarantee that every unit leaving our house is free from defects, and we provide a **warranty of two (2) years from the date of purchase** for each unit to function correctly when operated within its specifications and handled with adequate care. Should a unit prove to be malfunctioning due to manufacturing defects within this time period we will replace it with a compatible working unit free of charge.
